CLEAN 'N Swim

NON CHLORINE OXIDISER

ACTIVE CONSTITUENTS:
Potassium Mono Persulphate

CONDITION OF SALE

FOCUS PRODUCTS P/L will not accept any responsibility howsoever it will arise and whether consequently or otherwise in connection with the supply or use of these goods other than their responsibility for the merchantable quality of the goods and such responsibilities mandatorily imposed by applicable statutes. To the extent allowed by such statutes the liability of FOCUS PRODUCTS P/L is limited to the cost of the product purchased.

Clean'N Swim has been specifically designed to oxidise or 'burn out' chloramines that have built up in your swimming pool. This will assist the chlorine to work more efficiently and keep the pool sanitised and safe for swimming. Clean'N Swim can be used with chlorine levels that are high or low.

GENERAL INSTRUCTIONS

Clean'N Swim is the preferred shock treatment for all pools, spas and hot tubs.

Add 1 bag (500g) per 50,000lt of pool water.

Procedure: Broadcast evenly across pool surface and run filter for minimum 4 hours. Bathing can resume as soon as complete mixing has occurred. Check water balance after treatment.

Note: Clean'N Swim when used in a Bromine sanitised pool or spa, not only oxidises organic wastes but rejuvenates and restores tired bromine resulting in improved economy.

FIRST AID

If swallowed contact the Poisons Information Centre on 131126 (NEW ZEALAND 0800 764 766). If spilt on clothing, remove clothing and wash skin thoroughly. If contact is made with eyes, flood with water for 15 minutes and consult a doctor.
