FILTER CLEANER AND DEGREASER

ACTIVE CONSTITUENTS:
Contains 698g/kg Alkaline Salts

CONDITION OF SALE

FOCUS PRODUCTS P/L will not accept any responsibility howsoever it will arise and whether consequently or otherwise in connection with the supply or use of these goods other than their responsibility for the merchantable quality of the goods and such responsibilities mandatorily imposed by applicable statutes. To the extent allowed by such statutes the liability of FOCUS PRODUCTS P/L is limited to the cost of the product purchased.

APPLY THE PRODUCT WHEN FILTER IS NOT IN USE

DIRECTIONS FOR CARTRIDGE FILTERS

Turn the filtration system off.
Remove filter cartridge from pool or spa filter and hose filter element to remove any loose debris.
Make a cleaner solution (250g per 20 litres) to fill a suitable bucket or bin with enough water to cover the cartridge.
Submerge the filter cartridge into the diluted solution for 24 hours.
After 24 hours agitate the cartridge in the solution then rinse thoroughly.
Reassemble filter, then resume normal filtration.
It is advisable to purchase two sets of filters so that they can be rotated. This will prolong filter life.

DIRECTIONS FOR MEDIA FILTERS

IMPORTANT - If filter is installed below water level, ensure pump inlet valve is open for first backwash -closed for Filter Cleaner & Degreaser treatment and reopened for second backwash before returning to normal filter operation.
Establish correct media capacity of filter (total kilos).
Measure 2 grams of "FOCUS FILTER CLEANER & DEGREASER" filter cleaner for each kilo of media contained.
Pre-mix the required amount of "FOCUS FILTER CLEANER & DEGREASER" cleaner at the rate of 150 grams per 10 litres of water. eg: 300g into 20 litres of water.

PROCEDURE

Backwash filter for two minutes, switch pump off, and move valve handle to Rinse position. Close pump inlet valve if fitted.
Remove the pump lid and add pre pre-mixed solution to the hair and lint pot of the pump.
Refit pump lid, locate and observe the backwash sight glass then switch pump on until a white colour appears at the backwash sight glass. This indicates complete saturation of the media bed. Switch pump off immediately.
Allow the filter to stand overnight.
The following morning, return valve to backwash position, open pump inlet valve if fitted, switch pump back on and carry out complete backwash and rinse procedure before returning to normal filter operation.

Filter cleaning is recommended once or twice per year for optimal performance.

SAFETY DIRECTIONS

Keep out of reach of children. Avoid contact with eyes and skin as it will irritate. Always wear rubber gloves when opening the sachet and using the product and always wash hands after use. Avoid breathing in dust. Add the product to water, never the reverse. DO NOT mix with other chemicals.

STORAGE AND DISPOSAL

Store in the original sachet ensuring it is closed securely and in a cool dry place out of the reach of children. DO NOT store in direct sunlight. Rinse empty container in the pool water before disposal. Dispose of empty container with household waste.

CAUTION

NOT TO BE USED AS A FOOD CONTAINER. KEEP OUT OF REACH OF CHILDREN.
NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

FIRST AID

If poisoning occurs, contact a doctor of the Poisons Information Centre. (Australia: 131 126 New Zealand: 0800 764 766). If in eyes, hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised by the Poison Information Centre or a doctor, or for at least 15 minutes. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. If inhaled, remove from contaminated area. Apply artificial respiratory if not breathing.
