POOL **FLOC** CLARIFYING FLOCCULANT

CONDITION OF SALE

FOCUS PRODUCTS P/L will not accept any responsibility howsoever it will arise and whether consequently or otherwise in connection with the supply or use of these goods other than their responsibility for the merchantable quality of the goods and such responsibilities mandatorily imposed by applicable statutes. To the extent allowed by such statutes the liability of FOCUS PRODUCTS P/L is limited to the cost of the product purchased.

DIRECTIONS FOR USE

Add FOCUS FLOC to the pool water at a rate of 1 kilo per 40 000 litres of pool water for light contamination and 4 kilos per 40 000 litres of pool water for heavy soil suspensions.

APPLICATION

Before adding FOCUS FLOC to the pool water, the pH and total alkalinity must be checked and corrected. As FLOC is very acidic it should be used in conjunction with FOCUS pH BUFFER with the addition of 2 kilos for the light and 4 kilos for the heavy contaminations being a normal procedure.

Add the required dosage of pH BUFFER to the pool in a slurry mix before the addition of FLOC in a bucket of warm water and broadcast the solution over the pool surface. Allow the pool water to settle for up to 24 hours. DO NOT run the filter. The resultant precipitation of coagulated solids should be vacuumed to waste. If a D.E. Filter or cartridge filter is used, remove the pads or elements before vacuuming. Check pH and total alkalinity and adjust if necessary.

RISK

Harmful if swallowed. Risk of serious damage to eyes.

SAFETY

Keep out of reach of children. Keep away from food, drink and animal feed. When using, DO NOT eat, drink or smoke. Avoid contact with eyes, skin and clothing. Wear suitable protective clothing, gloves and eye protection. Dilute with water only, and add the product to the water. DO NOT breathe dust. DO NOT mix with other chemicals. Keep in a cool, dry, ventilated area. Re-seal bag when not in use.

FIRST AID

If you feel unwell, contact the Poisons Information Centre (Australia - 131126, NZ - 0800764766) or a doctor. If swallowed, DO NOT induce vomiting. Immediately wash out the mouth with water. Seek medical attention. In case of contact with eyes, rinse immediately with plenty of water and contact a doctor or the Poisons Information Centre. After contact with skin, wash thoroughly with soap and water. If irritation continues, seek medical advice.

WARNING

May be fatal to children
