SHOCK 'N CLEAR

ACTIVE CONSTITUENTS:
480g/kg available CHLORINE (Cl)
present as SODIUM DICHLOROISOCYANURATE

APVMA 54109/127187

CONDITION OF SALE

FOCUS PRODUCTS P/L will not accept any responsibility howsoever it will arise and whether consequently or otherwise in connection with the supply or use of these goods other than their responsibility for the merchantable quality of the goods and such responsibilities mandatorily imposed by applicable statutes. To the extent allowed by such statutes the liability of FOCUS PRODUCTS P/L is limited to the cost of the product purchased.

Focus Shock 'N Clear is a unique and convenient packaged pool chemical which combines algae knock out as well as gentle clean up within the one operation.

DO NOT USE THIS PRODUCT IN COMMERCIAL INDOOR HEATED POOLS OR COMMERCIAL SPA INSTALLATIONS.

THIS PRODUCT IS NOT SUITABLE FOR SUPER-CHLORINATION.

NOT TO BE USED FOR ANY OTHER PURPOSE, OR IN ANY MANNER CONTRARY TO THIS LABEL, UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

FOCUS SHOCK 'N CLEAR is a special blend of oxidisers and clarifiers which when used in several situations in the pool, produces clear and sparkling swimming pool water.

SITUATION 1: Green or cloudy water, slimy green film on pool surfaces.

SITUATION 2: Gradual build-up of non-filterable wastes which leaves the pool water dull, smelly and can cause skin & eye irritation.

SITUATION 3: NON-CHLORINE pools require fortnightly shock doses to oxidise the build up of bather wastes.

The correct level of free chlorine should be maintained for several hours prior to and during swimming activity.

Chlorine levels should be tested daily by use of a reliable test kit using fresh testing reagents. pH should be tested once per day using fresh testing reagents. If pH falls below the required level add Focus pH Increaser, if it rises above, add Focus Dry Acid. Dose pool in the evening when the pool is not in use.

Stabiliser levels must be tested fortnightly by your local pool shop or by the use of a reliable test kit. Once stabiliser levels reach 50mg/L, DO NOT use this product until stabiliser levels fall below that level.

INSTEAD use FOCUS GRANULAR CHLORINE to maintain free chlorine levels. If 50mg/L of stabiliser is exceeded the ability of the chlorine to control algae and bacteria is reduced. UNDER NO CIRCUMSTANCES should stabiliser concentrations be allowed to exceed 100mg/L. If stabiliser concentration needs to be reduced, consult your local pool shop.

ROUTINE APPLICATION RATE

Ensure that the filter is clean. With pump and filter in operation follow the volume dosage rate table and apply the required amount into the skimmer. Allow the filter and pump to run for at least 2 to 4 hours following application. The brushing of pool surfaces and vacuuming may be required in Situation 1 to remove dead algae. An additional application of SHOCK 'N CLEAR is also recommended following heavy rainfall or heavy bather loads.

POOL VOLUME (L)	0-50,000L	50,000-100,000L
DOSAGE	500g	1000g

	CHLORINE LEVEL (MINIMUM)	TOTAL ALKALINITY (MINIMUM)	STABILISER LEVEL (ISOCYANURATE)	pH
COLD WATER	2mg/L	60mg/L	25-50mg/L	7.2 -7.6
HOT WATER>26°C	3mg/L	60mg/L	25-50mg/L	7.2 -7.6

CAUTION

NOT TO BE USED AS A FOOD CONTAINER.

STORAGE AND DISPOSAL

Store undercover in a dry, clean, cool, well-ventilated place away from sunlight. Store and transport in an upright container. In case of spillage, flush with large quantities of water. Rinse empty container in the pool water before disposal. Dispose of empty container with household waste.

SAFETY DIRECTIONS

Highly reactive oxidising chlorine compound. May cause fire and explosion or produce severe burns. Harmful if swallowed. Will damage the eyes. Product will irritate the eyes, nose, throat and skin. Avoid contact with the eyes, skin and clothing. DO NOT inhale dust. When opening the container and using the product, wear rubber gloves. If product on skin, immediately wash the area with soap and water. If the product is in eyes, immediately wash it out with water. Wash hands after use. DO NOT allow the product to come into contact with other chemicals, especially acids, or with combustible material such as paper, fabric, sawdust or kerosene. DO NOT allow it to get damp. Use clean containers for dispensing. DO NOT mix with other chemicals. DO NOT mix with different types of chlorinating chemicals. Mix with water only. DO NOT add water to the product – add the product to water, but in case of fire, drench with water.

FIRST AID

If poisoning occurs, contact a Doctor or Poisons Information Centre (Phone 13 11 26). If swallowed DO NOT induce vomiting. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.
