

# Techo...Need To Know

## Ozone Mixing Degas Vessel (optional extra)

The Mixing Degas Vessel will separate and remove/destroy any undissolved ozone gas, eliminating bubbles in the pool.

The degas is highly recommended for pools with an automatic cover, indoor pools and spas. It can also be used on negative edge/infinity pools or other applications where a surface disturbance caused by the bubbles is unwanted.

Carbon  
Destruct  
cartridge

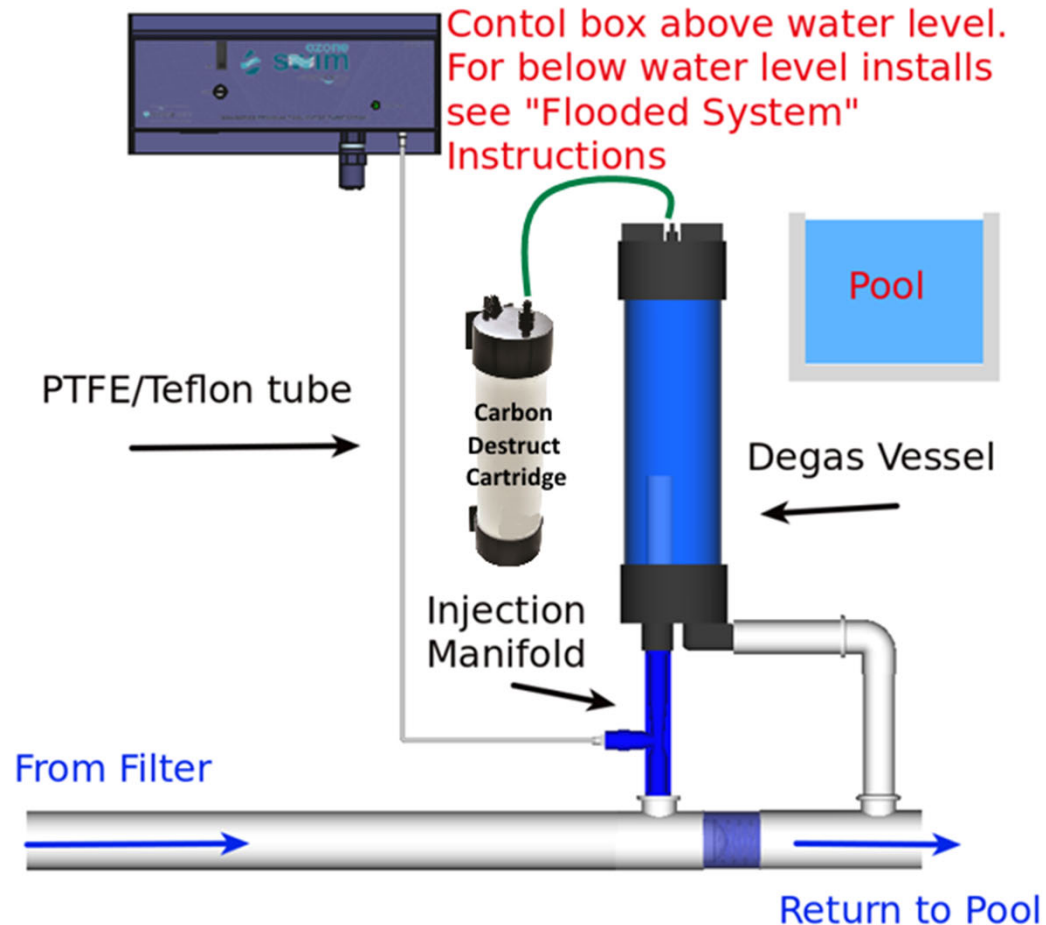

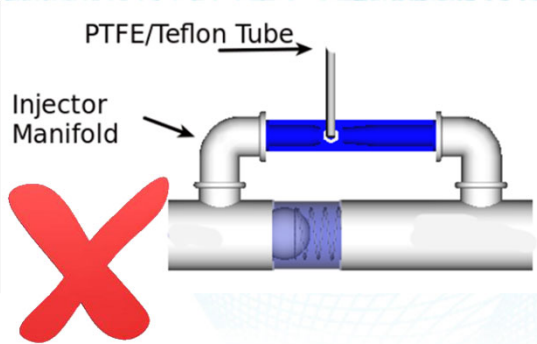

# Standard "Non-Flooded" Indoor install

Optional extra –  
Degas chamber

Standard supplied  
Injector manifold not required

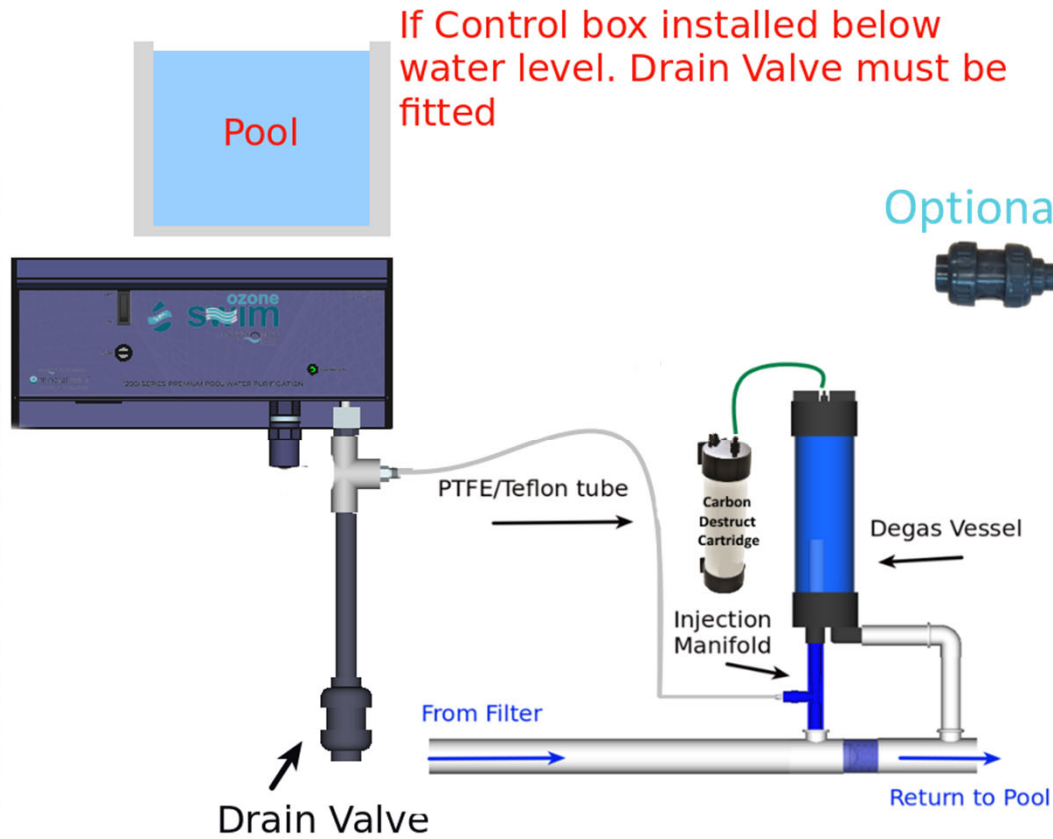

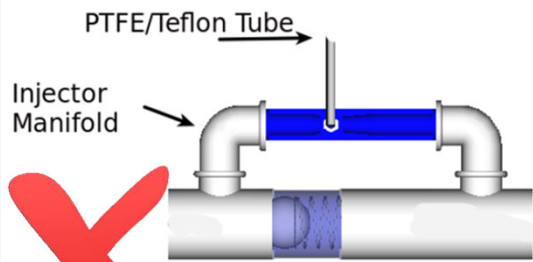

# Standard "Flooded" Indoor install for below water level
